COMMONWEALTH PHARMACISTS ASSOCIATION

The Problem

Up to 50% of antibiotics around the world are **prescribed incorrectly.** In LMICs communicable diseases contribute **8 out of the top 10** causes of death. However, health workers often lack access to relevant AMS resources, training and guidelines.

The Solution

CPA's **Prescribing Companion App (PCA),** an up-to-date, evidence-based, offline-enabled and completely free app for clinicians.

This scalable, ready-to-deploy digital tool strengthens frontline care without need for new infrastructure.
